

# FIELD REPORT ON KAZIRANGA NATIONAL PARK

17<sup>th</sup> October, 2017

DEPARTMENT OF GEOGRAPHY  
CHARAIBAHU COLLEGE

## **Introduction**

On 17<sup>th</sup> October, 2017, the Department of Geography arranged a field study programme at Kaziranga National Park for students in the 5<sup>th</sup> Semester of Geography (Major and General) to fulfill the requirements for the practical paper.

Kaziranga National Park is situated mainly in Golaghat district and in Nagaon district of Assam. It is about 191.6 km from away Guwahati. The National Park covers an area of 430 square kilometers with 6 ranges (divisions).

## **Objectives**

The main objectives of this study are:

1. To study about the in-situ conservation of biodiversity.
2. To examine the challenges confronted by Kaziranga National Park.

## **Methodology**

Relevant information was collected from the Director of the park and other park officials. Field visits were made to various locations in the park to get first hand impression of the park.

## **Observation and outcomes**

1. The students observed the many species of flora and fauna as well as their natural habitats in Kaziranga National Park.
2. Students asked people who live nearby about land encroachment in Kaziranga and unauthorized outsider ingress.
3. The students observed how the ecology of Kaziranga National Park was under risk due to wastage materials of Resorts and Dhabas in sensitive places.
4. Students discussed with the concerned authority about the Rhino poaching, a major problem for Kaziranga National Park.
